

PRAJITH P

Data Analyst | Aspiring Associate Data Scientist | Python | SQL | Machine Learning | Power BI
prajithp2k3@gmail.com | +91 9995506752 | linkedin.com/in/prajith-datascience | github.com/Prajith2K3

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in Python, SQL, and Power BI, building toward a T1 Associate Data Scientist role. Skilled in exploratory data analysis (EDA), statistical modeling, and predictive analytics (classification), with a track record of turning raw datasets into dashboards and business recommendations across churn, sales, and marketing analytics. Comfortable owning the analysis lifecycle — from data cleaning and SQL schema design through model training to stakeholder-ready reporting — and eager to grow these skills within a structured, mentorship-driven analytics team.

CORE SKILLS

- Languages & Databases: Python, SQL, MySQL
- Machine Learning & Statistics: Classification (Logistic Regression), Statistical Analysis, Predictive Modeling, EDA, Hypothesis-driven Analysis
- Analytics Libraries: Pandas, NumPy, Scikit-Learn, Matplotlib
- BI & Visualization: Power BI (DAX, Power Query), Tableau, Excel
- Core Competencies: Data Cleaning, ETL, Data Validation, Dashboard Development, Stakeholder Communication, Documentation
- Platforms: PyCharm, Jupyter Notebook, Visual Studio Code, IntelliJ IDEA

WORK EXPERIENCE

Data Analyst Intern | LetsGrowMore (Remote)

Dec 2025 - May 2026

- Performed exploratory data analysis (EDA) and statistical modeling on business datasets in Python and SQL, identifying trends that informed stakeholder decision-making.
- Cleaned, prepared, and validated datasets — resolving missing values, duplicates, and outliers — improving downstream model and reporting accuracy.
- Built and maintained interactive Power BI dashboards and reports, translating raw metrics into business-facing KPIs for cross-functional stakeholders.
- Documented analytical findings and methodology, supporting reproducibility and knowledge transfer to mentors and peers.

PROJECTS

Customer Churn Analytics & Retention Strategy |

Jun 2026 - Jul 2026

- Built an end-to-end churn analytics pipeline on 5,000 customer records using SQL and Python, applying EDA, statistical analysis, and predictive modeling.
- Designed a normalized SQL database schema and 10+ queries (CTEs, window functions, views) for churn, cohort, and revenue-at-risk analysis.
- Trained a logistic regression classification model (0.68 ROC-AUC) and built a 4-page Power BI dashboard with DAX measures to support a data-backed retention strategy.

Sales Performance Executive Dashboard |

Apr 2026 - May 2026

- Analyzed 6,583 sales orders worth \$4.64M in revenue using SQL and Python, uncovering a 40-60% seasonal demand pattern through statistical analysis.
- Built a normalized SQL schema and 10+ queries using window functions to calculate MoM and YoY revenue growth by region and category.
- Developed a 5-page Power BI dashboard with time-intelligence DAX measures, translating findings into inventory and regional investment recommendations.

Marketing Campaign Performance & ROI Analytics |

Feb 2026 - Mar 2026

- Evaluated \$860K in marketing spend across 40 campaigns and 5 channels using SQL and Python, achieving a blended ROAS of 7.06x.
- Applied CTEs and NTILE quartile segmentation to identify 12 underperforming campaigns and rank channel efficiency.
- Designed a 5-page Power BI dashboard with ROAS/CPA DAX measures, recommending a data-backed budget reallocation strategy.

EDUCATION

B.Sc. in Data Science and Analytics | Sree Saraswathi Thyagaraja College, Coimbatore, India Oct 2021 - May 2024

CERTIFICATIONS

- BCG X: Data Science Job Simulation (Forage) — Aug 2026
- Oracle Dev Gym: Databases for Developers - Foundations (98%) — 2026
- Microsoft Learn: Power BI Data Analyst Learning Path — Jul 2026
